

MICROTADELAKT

Decorative coating

CEMHER®

Spaces with soul

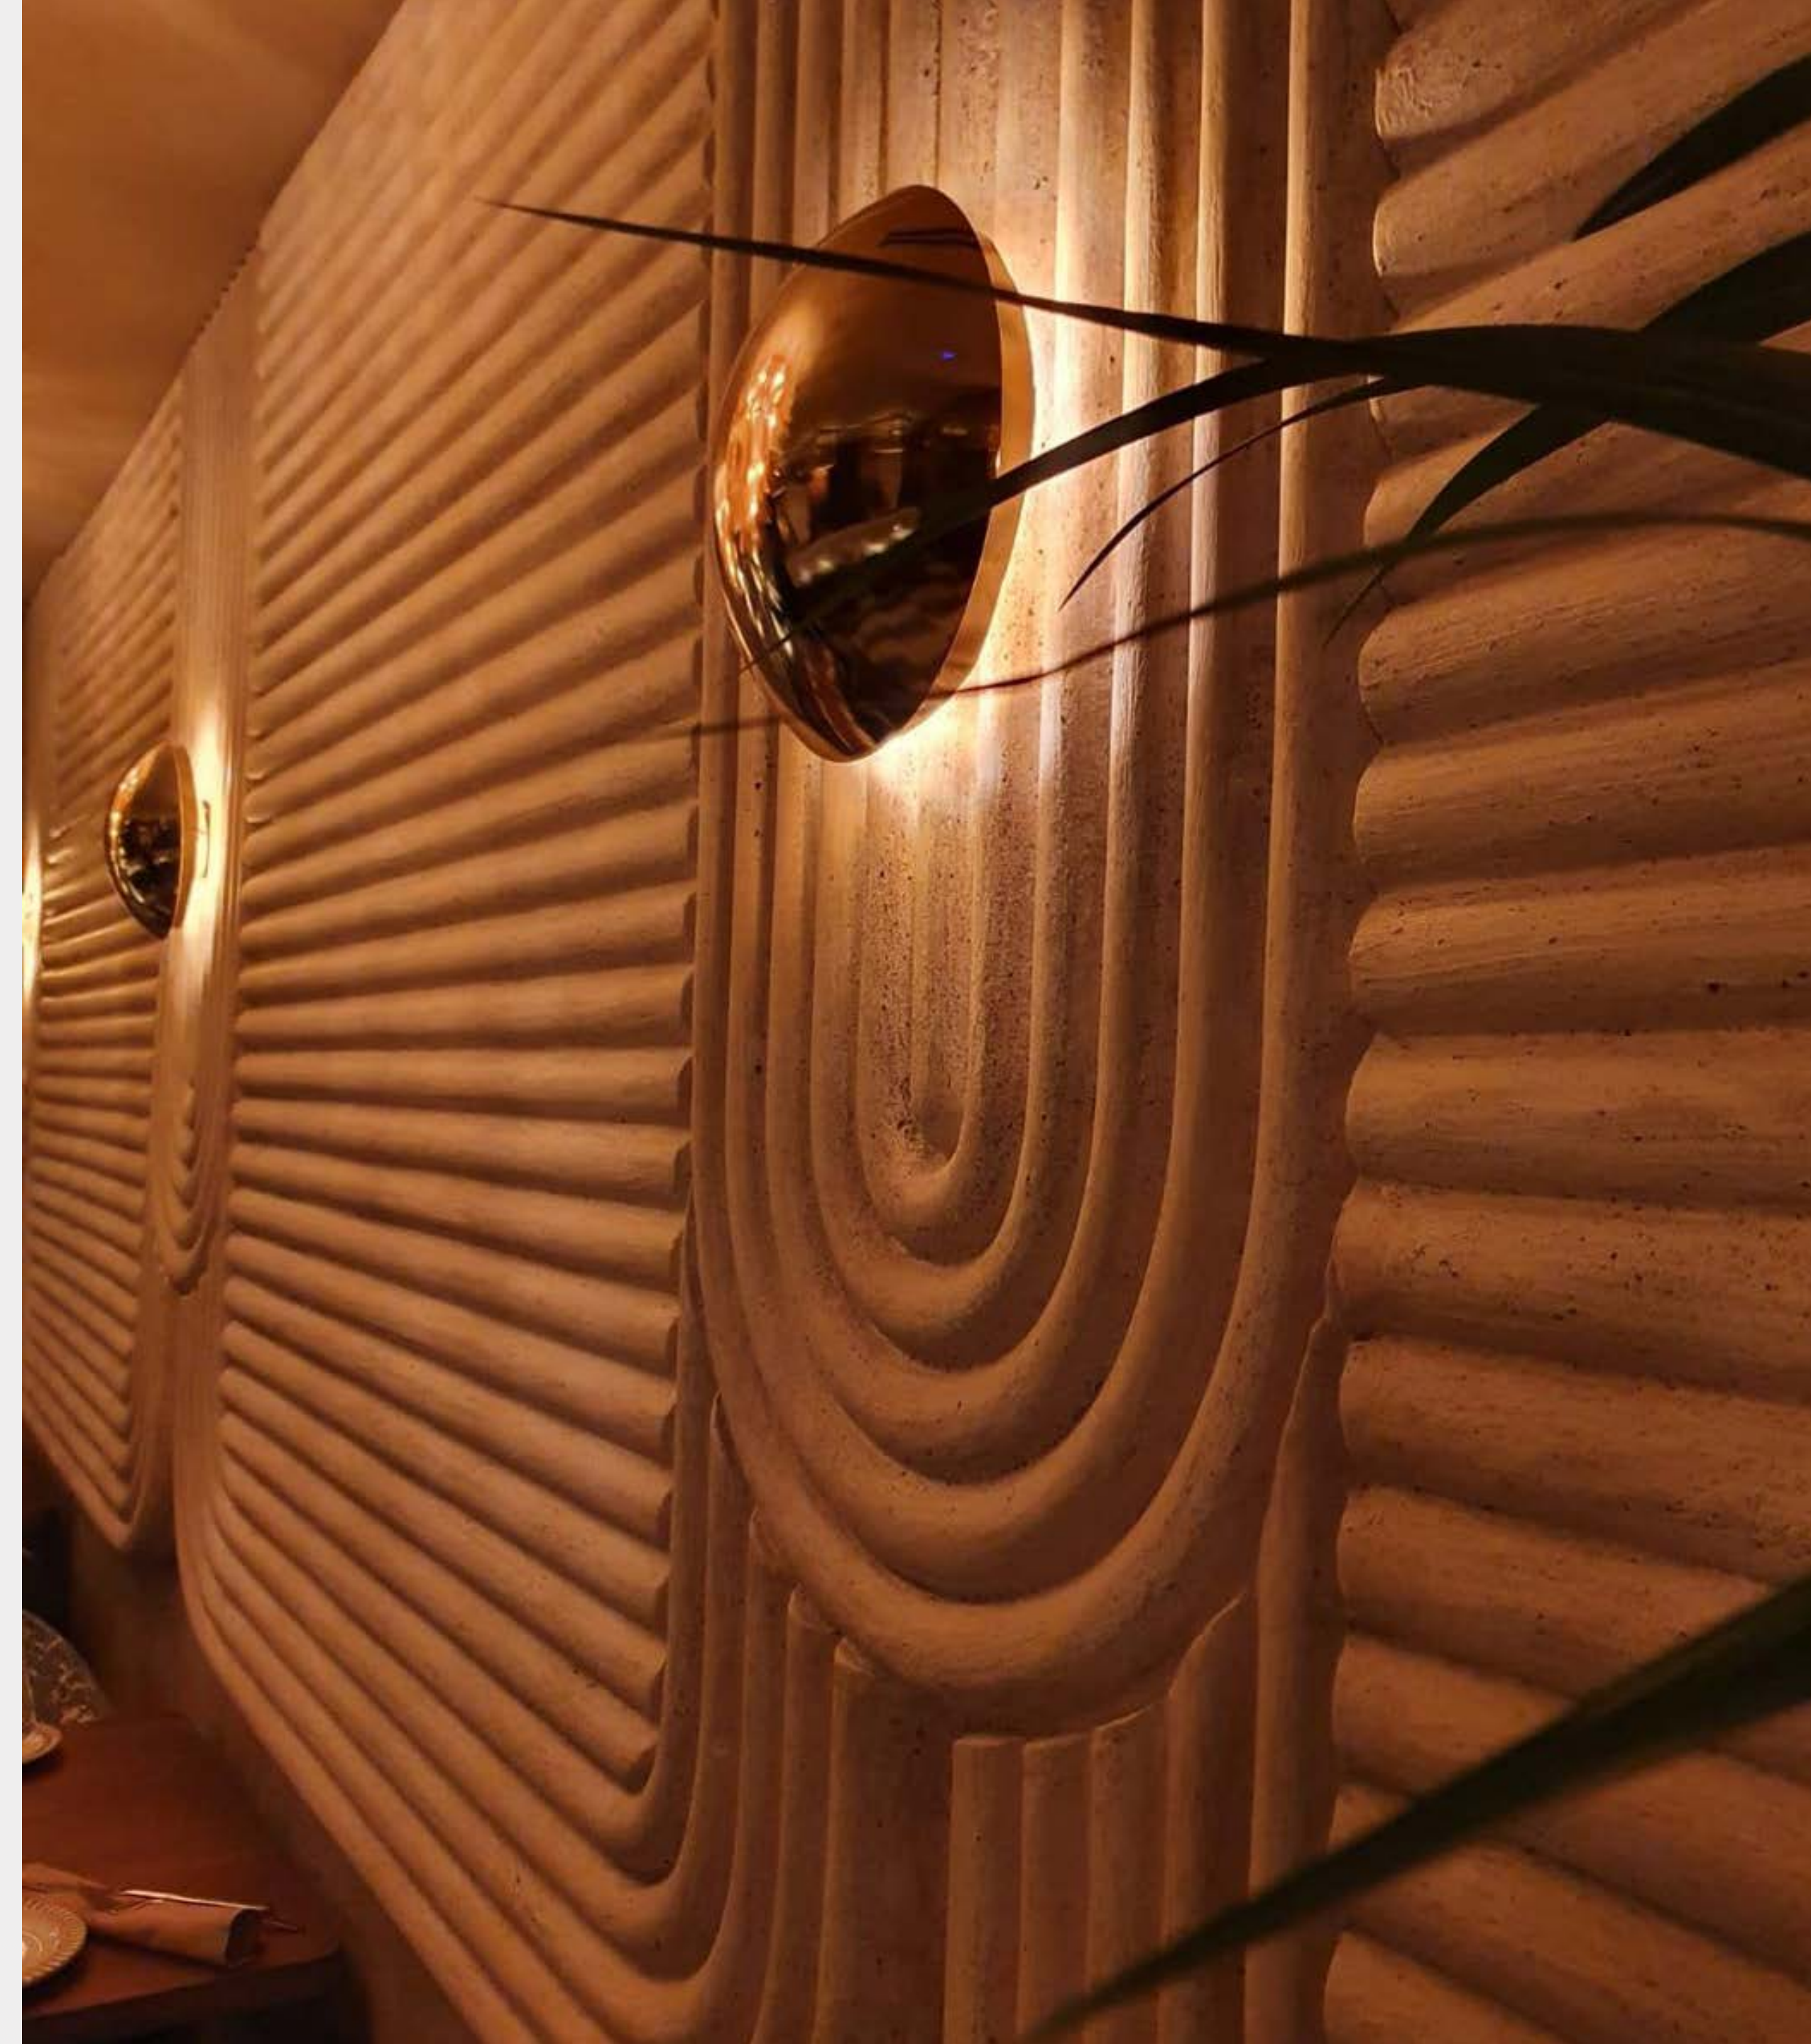

Cemher® is the place where the creation of unique rooms begins. Homes with their own personality.

HANDCRAFTED FINISH

Microtadelak® is a single-component lime-based microcement. It has been formulated to be applied as a low-thickness continuous coating on floors and walls. It stands out for its handmade finish, its workability and its extreme hardness.

Hardness & Handcrafted

Microtadelakt Microcement

CONTINUOUS DECORATIVE COATING

It is applied by trowel in several coats allowing to achieve a wide variety of effects such as tadelakt finishes or exposed concrete. As part of an application system, the surface is prepared with **Microtadelak®** base followed by **Microtadelak®** Medium or Regular finishes.

Microtadelak® is a highly decorative continuous coating for interior and exterior floors, walls and ceilings. It can be used as a covering for furniture, shelves, kitchen countertops, counters, etc.

Microtadelak® can be used as decorative cladding for stores, offices, lobbies, exhibition areas, homes, etc. It can be used in interior and exterior rooms, as well as in kitchens, bathrooms and terraces. Coating of pedestrian pavements in interiors or exteriors on cementitious surfaces.
